EXPERIENCE

Lead Frontend Engineer • Sahil Jan 2024 – Present

- Designed the Sahil logo, creating a unique and memorable visual identity for the brand.
- Developed comprehensive brand guidelines, including typography and color palettes, to ensure consistency across all applications.
- Created and built the Sahil landing page.
- Ensured cross browser compatibility and optimized web applications for performance and scalability.
- Conducted code reviews and provided constructive feedback to team members.
- Resolved bugs and performance issues, enhancing user experience and overall application reliability.
- Kept up-to-date with the latest industry trends and technologies to continuously improve frontend development skills.

Intern • ACOP May 2021 – Sept 2021

- Improved the UX and UI of the company website.
- Assisted senior developers in the development and maintenance of a management system that kept track of company details like their employees.
- Participated in brainstorming sessions to generate innovative ideas.
- SEO optimization for faster load time by minifying code, image optimization and compression among others SEO methods.
- Software installation & configuration of operating systems, Linux & Windows as well as software testing and debugging.
